

Starnovation is a global trader and facilitator of scrap and recyclable ferrous and nonferrous metals. We are trusted partner to range of companies across the recycling industry from processors, smelters, to manufactures. We handle all major categories of metal scrap and recyclable non-ferrous metals Like :

**ALIMINIUM**

**COPPER**

**LEAD**

**ZINC**

**BRASS**

Starnovation has to enhance and grow its core metal recycling business while also developing an innovative recycling solution internationally. Our aim is providing reliable and high quality of services in every phase of client relationship. Our proven experience and technical understanding are unparalleled in the industry. We focus not only on developing and maintaining the products and services, but also on building long term relationship with the clients. Uniqueness of the basics which really sets us apart is that we work with you and pay constant attention to your requirements. Our services are the most promising you can find whether before or after sales.

## WHY TO WORK WITH STARNOVATION

- Starnovation Employs state of the art technology and dedicated team of professionals with sound market knowledge.
- Very wide range of authenticated sources all across the globe.
- We work closely with our clients as an extended procurement team to plan and procure material as per their requirement and also optimize the cost of raw material by sourcing right material from the right place.
- The entire process including procurement of right material grade, quality check, shipping, documentation and delivery is monitored and executed very efficiently.
- We are able to establish long term relationships with our buyers and suppliers by following the ethical and professional business practices.
- We have wide range of customer's right from those who are buying just few containers in a month to few thousand MT every month. Hence, we understand the requirement of all kinds of customer and provide them the optimum solutions as per the requirements.
- Our existing buyer prefers to work with us because they value our partnership approach. We work together with them to maximize the revenue from scrap and minimize inventory and capital cost.
- We know that the best results are achieved through close commercial and technical collaboration, which is why we always take a long-term view, with the aim of understanding our customers' needs, priorities and future plans.

We listen and communicate directly and openly. We place great effort in our responsibilities to customers and suppliers alike. We are genuine in our views and genuine in our desire to meet expectations.

We are true to ourselves and to our customers and suppliers. We take pride in our work and act with professionalism and integrity.

We are passionate about providing the optimum trading environment and are focused on adding to the success of our customers and suppliers.

We challenge ourselves daily to trade at the highest levels and with the highest quality of support for our customers and suppliers.

# ALUMINIUM

Aluminium is a non-ferrous and non-magnetic 100% recyclable metal. Physical properties of Aluminium scrap metal are not lost during the recycling process, and it can be recycled indefinitely with more than a third of all Aluminium produced globally originating from recycled scrap metal. All Aluminium scrap metal processed at Shredmet form is sorted and categorised prior to export into internationally recognised grades.
