Starnovation has to enhance and grow its core metal recycling business while also developing an innovative recycling solution internationally. We aim to provide reliable and high-quality services in every phase of client relationships. Our proven experience and technical understanding are unparalleled in the industry. We focus not only on developing and maintaining the products and services but also on building long-term relationships with the clients. The uniqueness of the basics which sets us apart is that we work with you and pay constant attention to your requirements. Our services are the most promising you can find whether before or after sales.

## WHY WORK WITH STARNOVATION?

- Starnovation Employs state-of-the-art technology and a dedicated team of professionals with sound market knowledge.
- Very wide range of authenticated sources all across the globe.
- We work closely with our clients as an extended procurement team to plan and procure material as per their requirements and also optimize the cost of raw materials by sourcing the right material from the right place.
- The entire process including procurement of the right material grade, quality check, shipping, documentation, and delivery is monitored and executed very efficiently.
- We can establish long-term relationships with our buyers and suppliers by following ethical and professional business practices.
- We have a wide range of customer's right from those who are buying just few containers in a month to few thousand MT every month. Hence, we understand the requirement of all kinds of customer and provide them the optimum solutions as per the requirements.
- Our existing buyer prefers to work with us because they value our partnership approach. We work together with them to maximize the revenue from scrap and minimize inventory and capital costs.
- We know that the best results are achieved through close commercial and technical collaboration, which is why we always take a long-term view, to understand our customer's needs, priorities, and future plans.

We listen and communicate directly and openly. We place great effort in our responsibilities to customers and suppliers alike. We are genuine in our views and desire to meet expectations.

We are true to ourselves and to our customers and suppliers. We take pride in our work and act with professionalism and integrity.

We are passionate about providing the optimum trading environment and are focused on adding to the success of our customers and suppliers.

We challenge ourselves daily to trade at the highest levels and with the highest quality of support for our customers and suppliers.

# ALUMINUM

Aluminum is a non-ferrous and non-magnetic 100% recyclable metal. Physical properties of Aluminum scrap metal are not lost during the recycling process, and it can be recycled indefinitely with more than a third of all Aluminum produced globally originating from recycled scrap metal. All Aluminum scrap metal processed at Shred met form is sorted and categorized prior to export into internationally recognized grades.

BRASS HONEY SCRAP

MIL BERRY COPPER SCRAP

BARLEY COPPER SCRAP

## BRASS

Brass is a non-ferrous and non-magnetic metal. With its ability to be easily remelted back to its original state without losing any properties, around 90% of all Brass Alloys being produced globally are recycled brass scrap metal.

BRASS INGOTS

## COPPER

Copper is a non-ferrous and non-magnetic 100% recyclable metal. Physical properties of Copper scrap metal are not lost during the recycling process and it can be recycled indefinitely. It is estimated that approximately 80% of the Copper ever mined is still in use today. It is the third most recycled metal after iron and aluminium.
